SUMMARY

Innovative Software Developer specializing in backend development, API design, and database management. Experienced in building scalable, secure systems, optimizing databases, and delivering high-quality solutions in collaborative environments. Proficient in Java, Spring Boot, PostgreSQL/MySQL, Docker, and REST APIs.

TECHNICAL SKILLS

Programming Language: Java 8 Backend Frameworks: Spring Boot, REST APIs

Databases: MySQL, Oracle API & Testing Tools: Swagger (OpenAPI), Postman

Architecture & Concepts: Low-Level Design (LLD), Class Diagram, Sequence Diagram

Version Control: GitHub, Azure DevOps

EXPERIENCE

Bluescope Information Technology - *Software Engineer | Banking & Trade Finance* Mar 2026 - Present

Project : Trade Innovation Plus (TI Plus)

Trade Innovation Plus (TI Plus) is a Trade Finance and Banking platform supporting LC, BG, Import/Export Trade, NPA Processing, and Nostro payment processing with SWIFT message validation, routing, and transaction processing (MT910, MT940, MT950, pacs.008, pacs.009).

Roles and Responsibilities :

- Worked on product configuration and customization.
- Developed business and regulatory reports.
- Implemented NPA Reverse Feed processing.
- Developed Nostro SWIFT message validation, routing, and transaction processing (MT910, MT940, MT950, pacs.008, pacs.009).
- Performed SQL analysis, defect fixing, and production support.
- Collaborated with business, QA, and stakeholders during UAT and releases.

Staunch InfoSolutions - *Software Developer , backend engineer*

Dec 2024 - Feb 2026

Project : EZBUILD

Built EzBuild, a low-code workspace platform inspired by Airtable, enabling users to create custom applications, dynamic data layers, and flexible views without coding.

Designed and implemented APIs and backend services supporting application management, data layer operations, view customization, and multi-tenant collaboration.

Roles and Responsibilities :

- Developed backend services using Java 8, Spring Boot, REST APIs, PostgreSQL, and MySQL.
- Built Workspace, Application, Data Layer, and View Management modules.
- Implemented cloning functionality for applications and data layers.
- Developed Role-Based Access Control (RBAC) and audit tracking features.
- Designed and optimized database schemas, queries, and REST APIs.
- Containerized services using Docker and collaborated with frontend teams for feature delivery.

Tech Stack: Java 8, Spring Boot, PostgreSQL, MySQL, REST APIs, Docker

EDUCATION

Erode Sengunthar Engineering College

B.tech in information technology

CGPA: 8.10

2020-2024

St'Pauls Matriculation Higher secondary School
